Fax: 225-765-0222

Dear Ms. Lezy:

Per a conversation between the Office of Environmental Services (DEQ) (Pam) and our Director of Compliance Management, Carol Williams, we are requesting a "Letter of No Objection" for a freezer building at the Jourdan Terminal, Port of New Orleans, facility. We need this determination as quickly as possible.

New Orleans Cold Storage will provide the renovations for a storage and freezer facility which will use a closed ammonia refrigeration system as its refrigerant. New Orleans Cold Storage operates public refrigerated facilities, which in this case will primarily store and export frozen products leaving the Port of New Orleans.

Typically ammonia central systems will only lose approximately 2% of an estimated charge of 28,000 lbs. per year through normal maintenance and purging. We do not consider this significant for permitting particularly since ammonia is known to be a biodegradable.

Please let me know if you need any additional information.

Sincerely,

A handwritten signature in black ink that reads "Henry Bonar". The signature is written in a cursive style.

Henry B. Bonar, II

cc: Jeff Plauche, Port of New Orleans
Gary Escoffier, NOCS
Carol S. Williams, Bonar Engineering & Construction Co.
